

## EYPC E-Docs

### Problem Tree

Directions: Use this handout to create your Problem Tree with your group. First, draw your tree trunk in the middle of this handout to represent your community's problem. Next, draw your roots to represent causes to your problem. Leave space to draw more roots that stem from these roots. Finally, you will draw branches to represent effects of your problem and leaves to represent short-term and long-term impacts of these effects.
